

To The FCC: I'm a truck driver and I benefit tremendously from the service that XM satellite provide to me and the thousands of truck drivers out there. We need this information provided to us way ahead of schedule, so we can plan our routes and time arrivals at our destinations to deliver. See, everybody benefits from XM radio. It also keep us alert thru sections of this nation were we dont get any signals. We need this services from XM radio and we should be glad that they're here to provide us with it. It's my choice to listen to XM radio and I don't need NAB to tell me where to get my information from. The same way it is my choice who i vote for and also what web-sites i listen music from. Are they gonna try to stop that too? Well Mr. FCC, If you try to stop XM radio from doing a great thing, then you gonna have to stop satellite TV from giving me weather info also. So, on who's side you're on. Are you fare? PLEASE REJECT NAB's PETITION 04-160, because your real friends are out here and not sorrounding the White House. Thanks for listening the needy.
